

Oleksii Tsioma

Principal Engineer • Full Stack Development & Platform Architecture

New York City • oleksiitsioma@gmail.com • linkedin.com/oleksiitsioma

Summary

Principal-level engineer with 13+ years building and owning high-traffic web platforms for enterprise and media companies. Sole technical owner of a 1M+ monthly-user platform; led enterprise WordPress migrations (Rocket Mortgage headless architecture) and designed full-stack systems at scale (Ford, Royal Caribbean). Deep expertise in full-stack architecture, AI service integration, product strategy, platform ownership, and team leadership. Strongest in PHP/WordPress and React/TypeScript; experienced across DevOps, AI Development and Integrations, mobile development and product strategy.

Experience

Principal Developer | Travel Portland

Aug 2025 – Present

AI Integration, MCP Development, WordPress, TypeScript, Node.js, React Native, DevOps

- Lead engineer and technical owner of a 1M+ monthly-user destination marketing platform; own architecture, engineering standards, and long-term technical strategy.
- Executed comprehensive platform refactor focused on separation of concerns and maintainability at scale; established org-level governance for code review, deployment, and infrastructure management.
- Introduced agentic development and AI tooling supporting multiple organization departments.
- Lead development team and contractors; establish code review standards and governance practices.

Senior Software Engineer | The Wild Fields

Jan 2023 – July 2025

AI Integration, Full-Stack Development, WordPress, Node.js, TypeScript, Mobile Development, DevOps, AWS

- Founded and lead a full-stack consultancy advising businesses on digital transformation, technology architecture, and implementation strategy. Oversee development teams through project delivery.
- Delivered flagship projects including an AI-powered election information platform with intelligent matching and recommendations, and a real estate matching application powered by machine learning algorithms.
- Led end-to-end development across diverse technology stacks: including high-performance platforms serving 100k+ monthly users, database architecture, and legacy system migrations to modern cloud infrastructure.
- Published and maintain open-source packages on Packagist and npmjs.com and contributed to multiple open-source initiatives; created comprehensive documentation supporting scalability and knowledge transfer.

Software Engineer | Jordan Crown

Mar 2022 – Feb 2023

Full-Stack Development, WordPress, Node.js, TypeScript, DevOps, Code Reviews

- Focused on infrastructure and framework work at a digital agency delivering headless WordPress platforms and full-stack JavaScript applications for diverse clients.
- Built and improved the internal backend framework powering the agency's portfolio: developed new features from scratch, maintained existing systems, and designed for scalability and client customization.
- Formalized internal engineering standards and deployment workflows, improving code maintainability and reducing developer onboarding time.

Software Engineer | Rocket Mortgage

Feb 2021 – Mar 2022

Headless WordPress, Gutenberg, Angular, TypeScript, Node.js, CI/CD, DevOps

- Served as WordPress Subject Matter Expert (SME) at Rocket Mortgage (Fortune 500), leading the end-to-end migration from a legacy CMS to a scalable Headless WordPress architecture.
- Architected a Gutenberg-block-based content model with a decoupled Angular/Node.js frontend; integrated the platform into company-wide CI/CD pipelines while maintaining enterprise security and compliance.
- Owned a platform serving 100k+ monthly users; designed reusable APIs and custom components to support business-critical, high-traffic content delivery.
- Established WordPress as a modern platform within the organization: conducted internal training, created documentation, and contributed to defining internal engineering standards and architecture patterns.

Senior Web Developer | Advantage Media Partners

Jun 2020 – Dec 2020

Full-Stack Development, WordPress, Node.js, React, Testing Frameworks

- Stepped into a senior developer role with expanded project ownership: led client scoping and technical estimation, made architecture decisions, and oversaw delivery across projects.
- Built full-stack JavaScript applications (Node.js/React) alongside custom WordPress sites, expanding technical capabilities beyond traditional WordPress development.
- Introduced code quality standards to the team: standardized testing frameworks (unit and E2E), build automation, and responsive design patterns.

WordPress Developer | Boost Solutions

Oct 2017 – Sep 2019

WordPress, PHP, Plugin Development, React, JavaScript, Code Reviews, CI/CD, DevOps.

- Developed custom WordPress plugins and features (Gutenberg blocks, Multisite setups) for high-traffic international client projects; served as primary English-language point of contact for technical scope discussions and feasibility assessments across time zones.
- Owned code quality standards: performed code reviews to establish best practices across the team and managed QA for plugin and theme releases in a high-volume environment.
- Built responsive, accessible UI components and integrated backend services (Laravel, React) into WordPress ecosystems, expanding technical depth across frameworks.

Freelance Web Developer

Aug 2013 – Sep 2017

WordPress, Drupal, PHP, JavaScript, Responsive Design.

- Delivered full-cycle web projects for 30+ clients across WordPress, Drupal, and other CMS platforms; owned client discovery, design, development, and long-term maintenance via ticketing systems.
- Led WordPress Multisite infrastructure migration for IT Step Academy: Consolidated 50+ separate WordPress sites into a unified Multisite network with zero-data-loss migration.
- Built responsive, accessible UI components using modern design tools; integrated backend services (Laravel) into WordPress environments for enhanced functionality and security.

Education**Master of Science in Data Analytics | Portland State University**

Expected 2027

Bachelor's in Business management | Kyiv National Economic University
